

CALL FOR APPLICATION FOR A RESEARCH SCHOLARSHIP

Refª Sinfonia-02708800–BI-7

[Portuguese version](#)

A call for tenders is now open for the attribution of one Research Scholarship within the scope of the Project “SINFONIA - Sustainable Agroecosystems, Food Innovation, and Artistic Practices for Climate Adaptation” financed by the European Union (FEDER), through the Northern Regional Programme (Norte 2030), under the following conditions, set out below.

Scientific area: Arts

Admission requirements:

General requirements:

Candidates for the Research grant must, at the date of application, be enrolled, or present a commitment to enroll in a study cycle conferring an (Doctoral) degree in Arts or related areas. Candidates for the Research Grant, after selection, to begin the contracting process, must enroll in the Science and Technology of the Arts doctoral program at the School of Arts, in accordance with the theme and work plan of the grant to be carried out within the scope of the aforementioned project. Indeed, this doctoral program must be carried out at the School of Arts of Universidade Católica Portuguesa and supervised by a team identified for the implementation of the work plan.

Candidates must have a Master in Arts, Engineering, Computer Science, or a related field.

Specific requirements:

Candidates must also have knowledge and/or research experience in the following areas:

- Background and/or experience in Informatics, Digital Arts, Creative Computing, or related fields.
- Knowledge of IoT, creative programming, Artificial Intelligence tools, and/or data visualization (e.g., Python, Processing, TouchDesigner, or similar tools).
- Interest in interdisciplinary approaches combining art, technology, and data.

- Ability to develop experimental or practice-based projects involving digital media or intelligent systems.
- Proficiency in written and spoken English.

Preferred Factors:

Will be considered preferred factors:

- Experience in interactive installations, generative art, or data-driven artistic projects.
- Experience presenting work in artistic, academic, or hybrid contexts (e.g., exhibitions, conferences, publications).
- Interest in environmental themes, sustainability, or climate-related artistic practices.

Work Plan:

The main goal of this research is to explore how AI-based predictive models can be used not only to understand environmental impact on artistic materials, but also to inform and inspire new artistic practices driven by environmental data.

The work plan includes:

- Theoretical and experimental research on environmental data and AI methodologies in artistic contexts.
- Use and adaptation of an existent environmental data collection system, using IoT sensors.
- Test and refine Artificial Intelligence models to identify patterns in environmental data and their potential impact on materials.
- Exploration of these models as creative tools for artistic interpretation and production.
- Development of artistic prototypes and interactive works based on environmental data streams.
- Critical reflection on the relationship between environment, data, and artistic creation.
- Public presentation of results through exhibitions, publications, and academic dissemination.
